# Introduction

Montreal's police department has witnessed changes due to the current pandemic and the closing and merging of stations over the last few years. A dataset of criminal acts<sup>1</sup> became available on the open data portal<sup>2</sup> of the city. For each act we have its category, the date and time, the geographic location and the police division assigned with it. The dataset covers the time from 01 January 2015 until today and is updated regularly. We wish to analyze the effects of the covid situation on crime trends.
